Report received and adopted

The engineer reported that tenders had been called for works referred. That dam at Boco Flat had been enlarged and cleaned out at cost of £15. That conference re water supply had been held at Charlton with Shire of St. Arnaud & Swan Hill representatives and in accordance with their instructions the survey to Lake Charmal had been completed, plan produced. As the drought has broken up no further work has been done in connection with wells &c. in Kniesbamial. Re application for dam near Sawyers, Green Forest, recommends that culvert be made and earth for approaches put by excavating a tank there.

Re proposed dams at Rheola and Burke's Flat – is of opinion that best site at Rheola is behind Tomkey's store, and at Burke's Flat the first gully from East of crushing plant will give sufficient supply at smaller cost than gully pointed out further East though the latter would have larger capacity but at greater cost. Works generally are making fair progress and final certificates have been given on Contracts Nos. 572. 596. 602. 607. 609. 616. 573. 573 & 574
